PROFESSIONAL PROFILE

MY RESUME

Nyree Mompoint

PROFESSIONAL PROFILE

Profile Summary

Who I Am

A developer by trade, a designer by instinct, and a founder by drive. I spent years writing code, debugging complex systems, and shipping digital products before AI entered the workflow. Today, I bring that foundation to building thoughtfully with AI.

Core Strenghs

Deep expertise in React, Next.js, TypeScript, UX/UI, and scalable design systems. I use AI to accelerate research, prototyping, and development, with the experience to challenge its recommendations, evaluate its code, and take ownership of the final product.

Career Snapshot

18+ years building across entertainment, career technology, education, and e-commerce. At Warner Bros. Discovery, I lead frontend work on shared systems supporting HBO, TCM, and Adult Swim. As founder of Recruit My Game, I bring that technical depth to product strategy and execution.

Work Experience

2013 - Present

Lead Senior Frontend Developer

Warner Bros Discovery (Now Skydance)

- Lead shared React systems supporting HBO, TCM, Adult Swim, and other brands. Built Figma-to-code token integration, streamlined brand onboarding, and implemented automated testing to support consistent, accessible experiences.

2021–2025

Senior Developer

MonsterCareers

- Built scalable React and Next.js applications within a monorepo architecture. Independently developed a TypeScript library for cross-domain attribution and delivered an interactive salary tool with responsive charts, filtering, and resilient API handling.

2018–2021

UX/UI Application Designer

1EdTech

- Turned complex education data into intuitive SaaS interfaces. Created developer-ready Figma prototypes, exceeded 93% WCAG accessibility compliance, and delivered ahead of schedule.

Work Experience

2016–2021

Graphic Designer / Frontend Developer

Reveille Software

- Designed and built the frontend for Reveille Analytics 8, turning complex data into accessible dashboards with responsive layouts and interactive visualizations using Bootstrap, Ignite UI, and Go.js.

2013–2017

Graphic Designer / Frontend Developer / SEO

Ryder Fleet Products

- Led design, frontend development, and SEO initiatives that helped the e-commerce site reach over $1M in monthly sales. Delivered a responsive website redesign and strengthened search visibility through data-driven SEO.

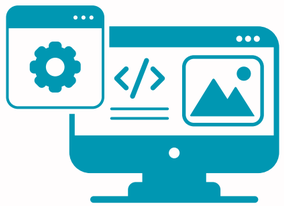
2010 - 2013

Interactive Developer

PureRED Integrated Marketing

- Led UI development for Dollar General's website, connecting creative direction with technical execution. Migrated site navigation to improve usability and delivered Rexall email campaigns with consistent rendering across devices and platforms.

KEY SKILLS



Frontend Engineering

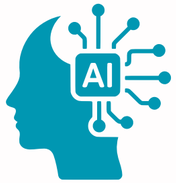
React · Next.js · TypeScript · JavaScript

UI/UX & Visual Design

Figma · Canva · Responsive Design

Design Systems

Component Libraries · Design Tokens · Storybook

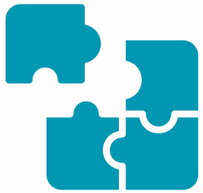


AI-Assisted Development

Prompting · Rapid Prototyping · Code Evaluation

Accessibility & Quality

WCAG · Cypress · Jest · Applitools · Playwright



Architecture & Integration

REST APIs · GraphQL · Monorepos · Headless CMS

EDUCATION

Education

BSc Computer Information Systems

Alabama State University

2000 - 2005

Honors / Top 6% of Class

Professional Courses

- Brighthouse Certification
- React Training
- AI Enablement Training using Claude and Cursor/Copilot

Achievements

01

E-Commerce Growth

Helped Ryder Fleet Products surpass $1M in monthly online sales through design, development, and SEO initiatives.

02

Multi-Brand Platform Delivery

Led frontend development of shared components and theme systems supporting HBO, Cinemax, DC, Adult Swim, and TCM.

03

Faster Brand Onboarding

Automated theme creation and onboarding to reduce manual setup and shorten time to market for brands joining the platform.

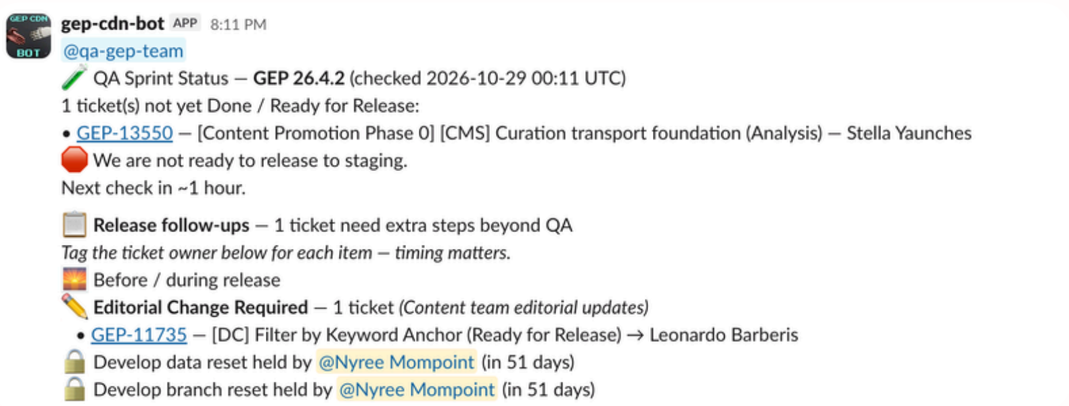
04

Creative Passion Projects

Designed, built & launched beardrop.app and recruitmygame.com

A Few Projects

I build tools that remove repetitive work and make complex delivery easier. From package updates to sprint coordination and brand onboarding, I turn recurring team challenges into practical, reusable systems.



Auto

PACKAGE UPDATES

Built automation that updates consuming repositories and generates pull requests whenever a new internal package version is published.

Sprint Coordination Bot

Built a Slack bot that reports open tickets and statuses through team tags and manages lower-environment checkouts.

Self-Service

Sprint visibility and environment coordination

Brand Onboarding

Automated theme creation and onboarding for new brands joining our shared multi-brand platform.

Faster Launches

Less manual setup. Shorter time to market.

“Grounded in code. Driven by design. Amplified by AI.”

B.S. in Computer Information Systems
Alabama State University · Cum Laude · 2005

20+ Years of Hands-On Development
Designing, coding, debugging, and shipping since 2005

BrightEdge Certified
Search Engine Optimization · 2014

AI-Assisted Engineering
Experienced judgment behind every prompt, review, and implementation

Beyond The Code

How I Work

Creative Thinker

I see possibilities and turn them into practical solutions.

Hands On Builder

I stay close to the code, from first concept through launch.

Always Learning

I explore new tools and bring experienced judgment to using them.

Interests

- Soccer & Youth Athletics
- Drawing & Visual Design
- Travel & New Experiences
- Landscaping & Outdoor Projects
- Building Products with Purpose
